Content

The Companion is divided into seven parts, each of which covers a major period or theme in the history of science.

1. Part 1: The Scientific Revolution

This part covers the period from the late Renaissance to the mid-17th century, and examines the rise of the new scientific method and the development of the major scientific disciplines.

2. Part 2: The Enlightenment and the Long 18th Century

This part covers the period from the mid-17th century to the late 18th century, and examines the development of science in the context of the Enlightenment and the rise of modern states.

3. Part 3: The 19th Century

This part covers the period from the late 18th century to the late 19th century, and examines the development of science in the context of the Industrial Revolution and the rise of new scientific disciplines.

4. Part 4: The 20th Century

This part covers the period from the late 19th century to the present day, and examines the development of science in the context of the two world wars, the Cold War, and the rise of new technologies.

5. Part 5: Science and Society

This part examines the relationship between science and society throughout history, and discusses the social, cultural, and political factors that have shaped the development of science.

6. Part 6: Science and Technology

This part examines the relationship between science and technology throughout history, and discusses the ways in which science has been used to develop new technologies.

7. Part 7: Science and the Future

This part looks to the future of science, and discusses the challenges and opportunities that lie ahead.

The Companion also includes a number of helpful features, such as a glossary of key terms, a timeline of major events in the history of science, and a comprehensive bibliography.

Audience

The Routledge Companion to the History of Modern Science is an essential resource for students, scholars, and anyone interested in the history of science. The book is also accessible to general readers who are interested in learning more about the development of modern science.
