Jamie Oliver was just 16 years old when she was diagnosed with lupus, a chronic autoimmune disease that can affect the skin, joints, kidneys, heart, and lungs. For years, she struggled with debilitating symptoms, including fatigue, pain, and swelling. She underwent multiple surgeries and spent countless hours in the hospital.

But through it all, Jamie never gave up hope. She refused to let lupus define her. Instead, she found strength in her family and friends, her faith, and her passion for writing.
